
Loss slowing and cumulative-ratio slopes
One changing-batch trajectory; no intermediate fixed-validation evaluations
Training cross entropy
Changing-batch training loss
Trailing 31-update token-weighted mean
Loss units per update
(symmetric log scale)
Trailing 31-update least-squares loss slope
Ratio change per update
(symmetric log scale)
raw B/A slope (trailing 31 updates)
adaptive B/A slope (trailing 31 updates)
Optimizer update
