Exact pairwise cosines at sparse checkpoints
Matched updates and parameter scope; each off-diagonal cell is one pair; diagonal = self-cosine

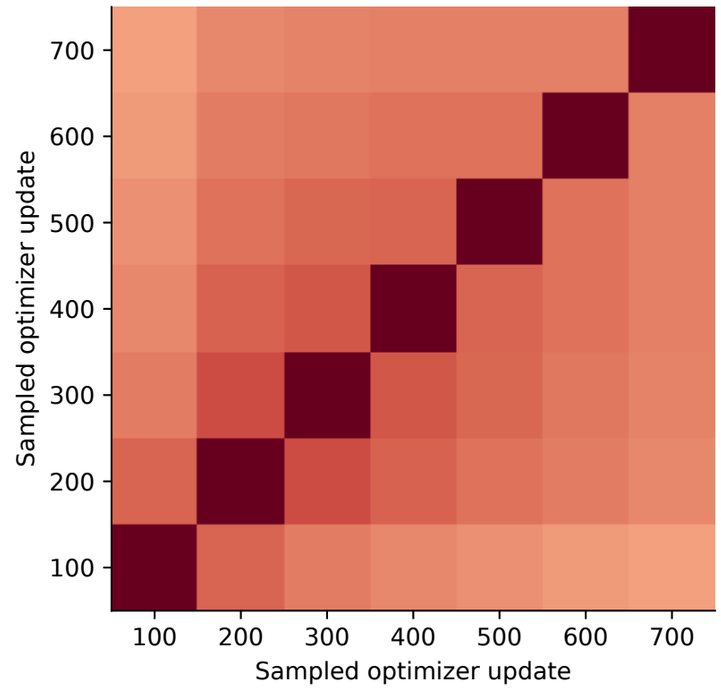

Run021, LR 0.001: Raw gradient

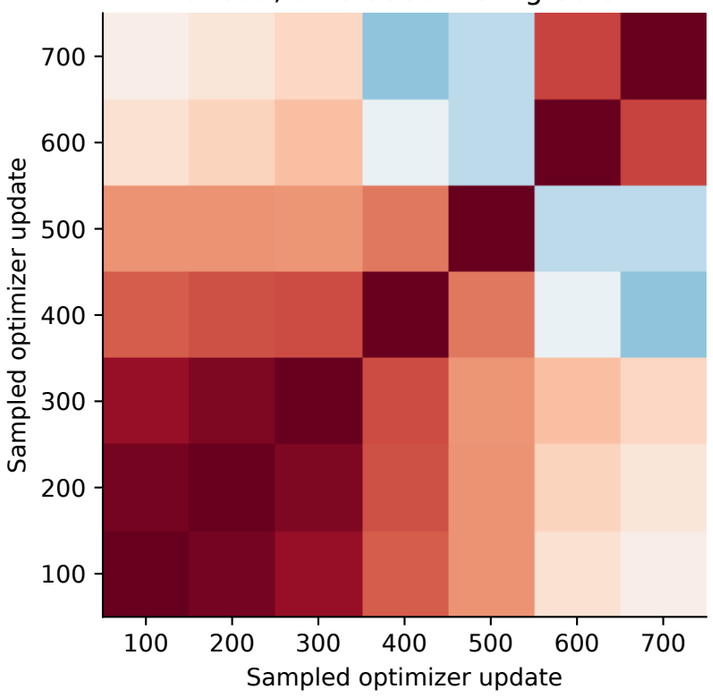

Run021, LR 0.001: Adam momentum m

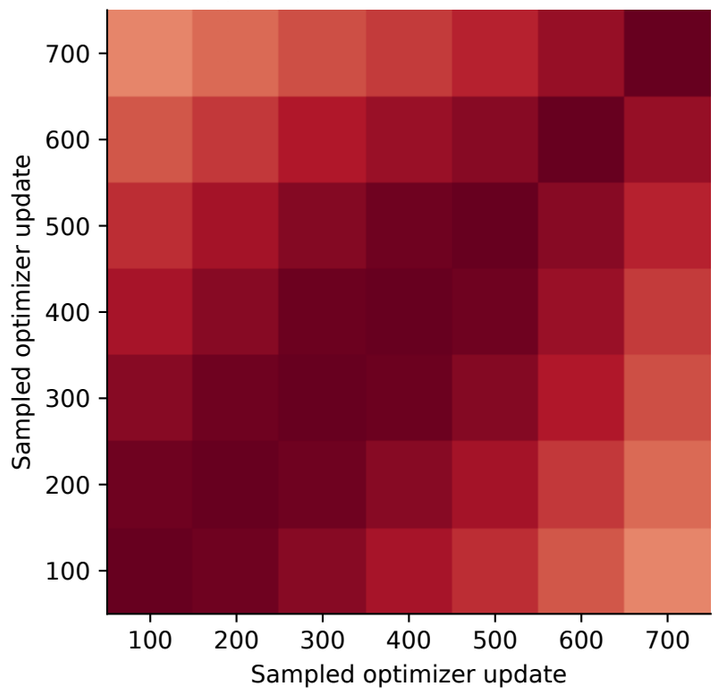

Run021, LR 0.001: Adam direction d

Run022, LR 0.0001: Raw gradient

Run022, LR 0.0001: Adam momentum m

Run022, LR 0.0001: Adam direction d
