Pythia-14M: Run021 (LR 0.001) versus Run022 (LR 0.0001)
Warmup only; identical initial weights and data order; seed 1234

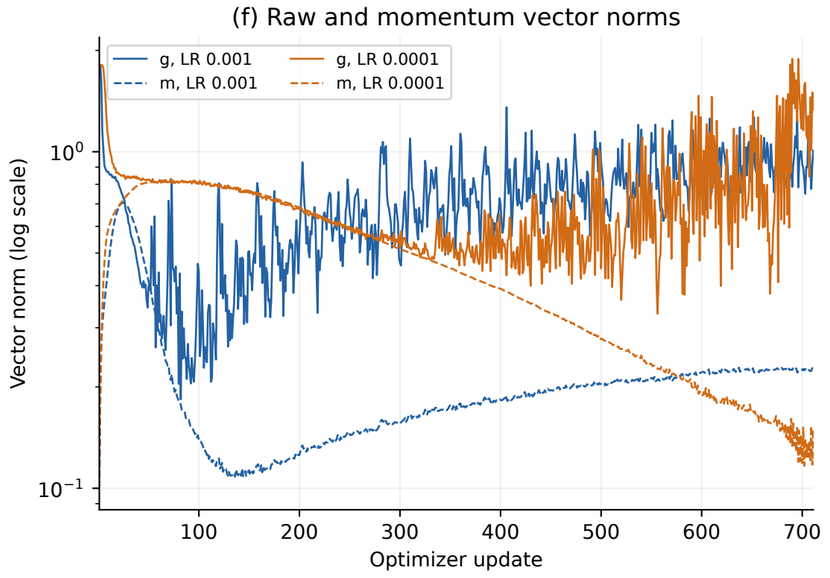

Light traces: individual updates. Bold loss: trailing 25-update token-weighted mean; bold cosines: trailing 25-update median.
A = sum of vector norms; B = norm of vector sum. g: raw pre-clip gradient; m: uncorrected Adam first moment; d: adaptive direction.
Display: full-sized updates 1-711. Numerical results retain partial update 712. No cross-seed uncertainty is estimated.
