Rosenbrock: Analysis009 squared cumulative geometry

Run028: Momentum, no decay
Run029: No momentum, no decay
Run030: Momentum, decay 0.1
Run031: No momentum, decay 0.1

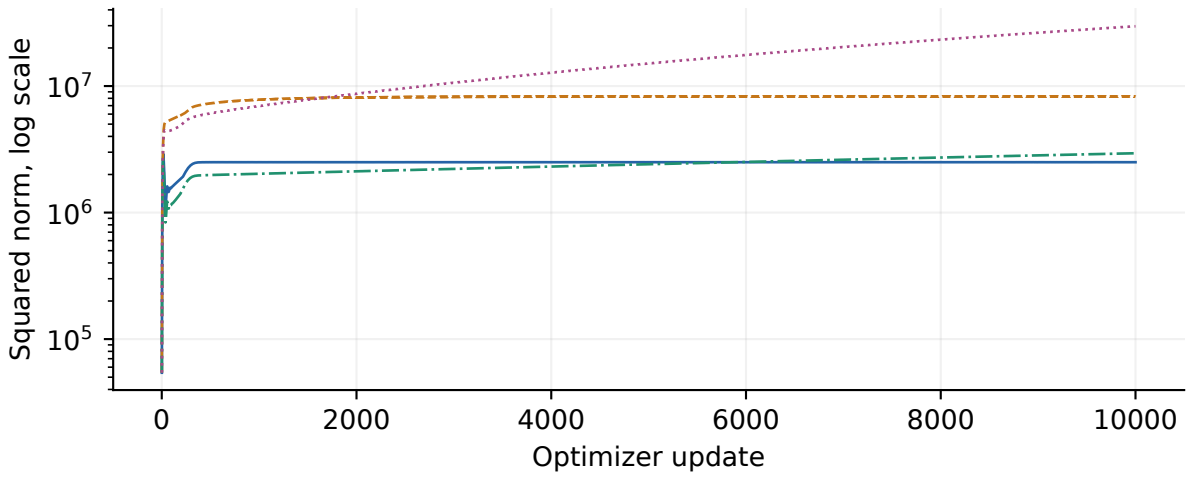

Raw g: A squared

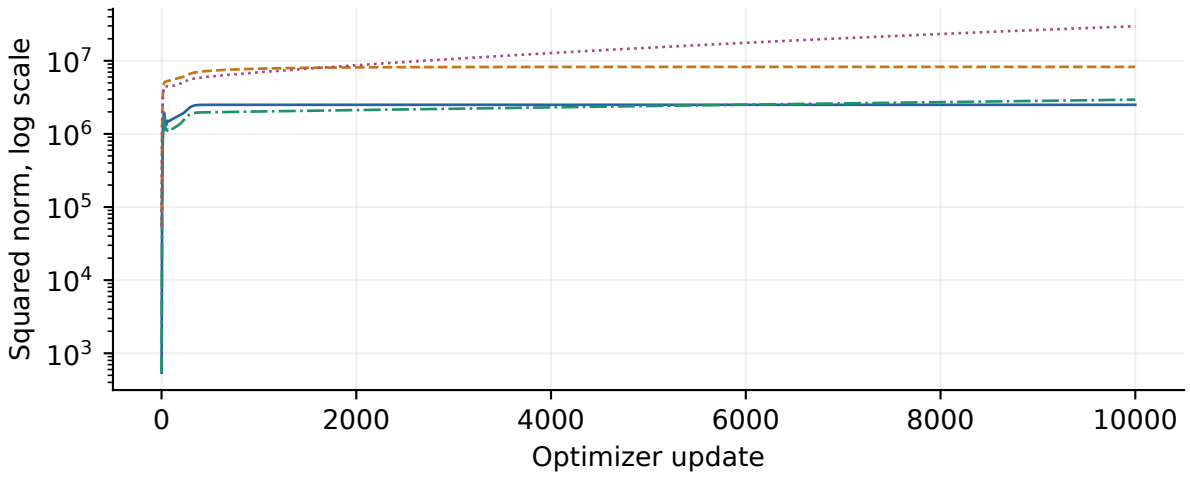

Momentum m: A squared

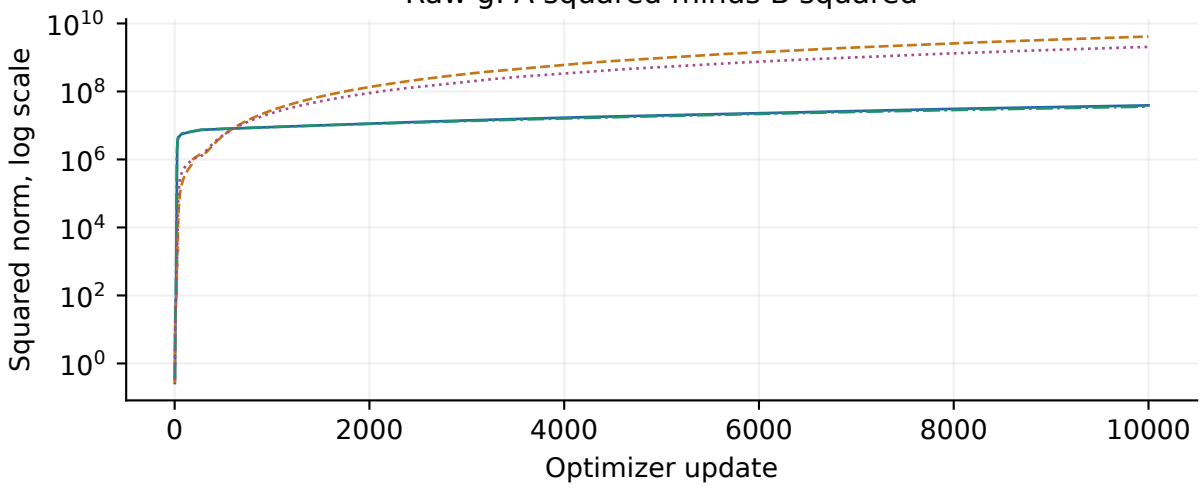

Raw g: B squared

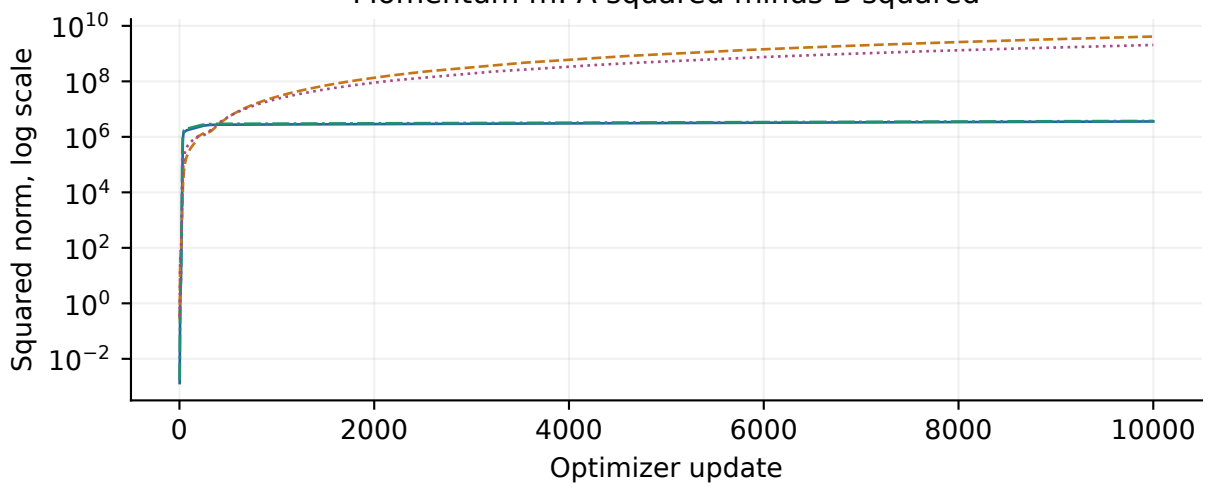

Momentum m: B squared

Raw g: A squared minus B squared

Momentum m: A squared minus B squared

Exact full prefixes, updates 1-10,000. A²-B² is a nonnegative triangle gap, not the signed pair interaction.
Independent log Y scales; zero/nonpositive values masked only for display, no epsilon replacement. One deterministic trajectory per condition.
