
Model size and MiniPile dynamics: updates 1-400
Pythia-14M
Pythia-31M
Pythia-70M
Loss change / update
(5-update trailing mean)
Optimizer update
$\hat{\eta}\hat{\kappa}_t$ (proxy)
Optimizer update
Raw adjacent cosine $\rho_t$
Optimizer update
Raw gradient $\|g_t\|_2$
Optimizer update
Loss panel: mean of L(t)-L(t-1), N=5; negative means falling loss. Other panels: unsmoothed.
First loss-change mean at update 6. Seed 1235; first pair undefined. Norm: log Y. AdamW eta*kappa is a proxy.
